

Pandas Installation, Verification & Troubleshooting Guide

This document provides an **end-to-end checklist** for installing, verifying, updating, and troubleshooting **Pandas** across multiple environments:

- Jupyter Notebook
- Local Environment Terminal (Command Line)
- Google Colab

1. Jupyter Notebook (pip-based)

Check Version

```
import pandas as pd  
pd.__version__
```

Install Latest Version

```
!pip install pandas
```

Update Pandas

```
!pip install --upgrade pandas
```

Install a Specific Version

```
!pip install pandas==2.2.2
```

Download Only (Wheel/Source)

```
!pip download pandas
```

Uninstall Pandas

```
!pip uninstall pandas -y
```

2. Conda Environment (Anaconda / Miniconda)

Check Version

```
conda list pandas
```

Install Latest Version

```
conda install pandas
```

Update Pandas

```
conda update pandas
```

Install a Specific Version

```
conda install pandas=2.2.2
```

Download Only (Without Installing)

```
conda install --download-only pandas
```

Uninstall Pandas

```
conda remove pandas
```

3. Google Colab

Pandas is pre-installed in Colab.

Check Version

```
import pandas as pd  
pd.__version__
```

Update / Reinstall Pandas

```
!pip install --upgrade pandas
```

Install a Specific Version

```
!pip install pandas==2.2.2
```

Download Pandas

```
!pip download pandas
```

Uninstall Pandas (Not Recommended)

```
!pip uninstall pandas -y
```

Note: Restart runtime after changes.
